WORK EXPERIENCE

Data Analyst III

Jan 2026 – Present

Arizona Governor's Office of Strategic Planning and Budgeting (OSPB) – Phoenix, AZ

- Manage end-to-end tracking and federal expenditure reporting for **100% of Arizona's \$4.4B ARPA portfolio** across **SLFRF and CPF** programs, building **Azure Data Factory, Synapse, and SQL** pipelines feeding **Power BI** dashboards for executive review and **US Treasury compliance** submissions.
- Automated weekly **Power BI** refresh ingesting **Microsoft Access GIMS2** exports through **Azure Functions and Logic Apps**, eliminating **100% of manual reformatting work** and cutting leadership reporting turnaround from days to the same day for the Governor's Office.
- Designed **anomaly detection** logic using **Azure ML and Azure OpenAI** across state agency grant data feeds, flagging irregular spend patterns, missing sub-recipient submissions, and inconsistencies in near real-time, cutting late cycle compliance issues by **75%** before federal reporting deadlines.

Data Analyst

May 2025 – Dec 2025

ASU Enterprise Technology – AZ-1 - Phoenix, AZ

- Analyzed daily refresh of statewide broadband datasets by building **Azure Data Factory and SQL** pipelines with parameterized triggers, dependency mapping, and failure alerts, cutting manual processing workloads by **45%** and giving leadership same-day access to coverage data across all of Arizona.
- Designed **Power BI** dashboards on a star schema model with tuned **DAX** measures, optimized aggregations, and drill-through filters with dynamic slicers, delivering sub second response times and enabling program teams to evaluate broadband coverage gaps across Arizona.
- Deployed **anomaly detection in Python and Azure ML** across **10M+ broadband records**, flagging schema violations, duplicate keys, and statistical outliers in real time, improving data accuracy by **35%** and resolving trust issues that had blocked statewide leadership from acting on the data.

Data Analyst

July 2024 – May 2025

Center for the Future of Arizona - Phoenix, AZ

- Analyzed large financial, health, and program datasets in **AWS** using **Python, SQL, and Alteryx**, surfacing KPI trends across stakeholder groups and producing evidence-driven insights that informed statewide policy decisions, funding allocations, and program.
- Built automated **Domo** dashboards and dataset pipelines using **Workbench, Magic ETL, and Beast Modes** with reusable transformation logic, centralizing cross-department metrics and cutting manual reporting workloads by nearly **50%** for stakeholder teams.
- Developed **scikit-learn regression models** to forecast program outcomes, funding needs, and resource allocation across departments, lifting planning accuracy by **30%** and shaping data-backed recommendations adopted by policy leaders to guide annual budget cycles.

Data Analyst

May 2023 – Jun 2024

Arizona State University (America Reads) - Phoenix, AZ

- Built **SQL based ETL pipelines in Python** and consolidated student, performance, and operational data into **Snowflake**, embedding data quality checks and validation routines that accelerated reporting cycles by **60%** for program leadership and improved governance across data sources.
- Automated near real time ingestion through **Snowpipe, Snowflake Tasks**, and change data capture patterns with incremental load logic, eliminating manual refresh operations and improving data accuracy by **40%** for faculty, tutors, and program staff.
- Developed **Tableau** dashboards and Excel automation with PivotTables, VBA macros, and predictive trend analysis, uncovering performance patterns across **200+ tutors and 1,500+ students**, cutting report preparation time by **70%** and optimizing budget, scheduling, and staffing decisions.

Risk Data Analyst -

Apr 2022 – May 2023

State Bank Of India- Remote, INDIA

- Replaced manual credit risk monitoring processes with automated **ETL pipelines in SQL, Python (Pandas), and SAS**, processing **10M+ loan records** across multiple portfolio segments, cutting data errors by **35%** and improving risk report delivery to senior leadership and risk committees by **50%**.
- Built **Power BI and SQL** dashboards tracking NPA ratios, default rates, portfolio concentration, and exposure metrics by region and product, enabling **40% faster risk assessment** for the credit team and supporting **RBI regulatory compliance** reporting and quarterly board-level risk reviews.
- Automated risk segmentation and early warning analysis using reusable **SQL scripts with joins, CTEs, and window functions**, plus Python validation workflows, reducing turnaround by **60%** and improving detection of high-risk accounts by **25%** across retail, MSME, and corporate loan portfolios.

TECHNICAL SKILLS

Programming & Tools: Python, SQL, R, Excel, Git, Linux, REST APIs, VBA, SAS

AI & Analytics: scikit-learn, Regression, Classification, Predictive Modeling, Azure OpenAI, LangChain.

Data & Cloud Platforms: AWS (Glue, S3, Athena, Redshift), Azure (Data Factory, Synapse, ML), GCP (BigQuery), Snowflake, MySQL

BI & Visualization: Power BI, Tableau, Domo, Alteryx, Looker, DAX, Star Schema, Dimensional Modeling

Data Analysis: Statistical Analysis, A/B Testing, Forecasting, KPI Tracking, Report Automation, ETL, Data Warehousing

EDUCATION

Bachelor of Science, Data Science (GPA: 3.7/4.0)

Jan 2023 – May 2025

Arizona State University

Tempe, Arizona

Associate of Science, Computer Science (GPA: 3.8/4.0)

Jan 2021 – Dec 2022

Ivy Tech Community College

Bloomington, Indiana

ACADEMIC PROJECTS

FinanceForge (Finance AutoML Platform) Tech Stack: AutoGluon, FastAPI, MLflow, Docker, PostgreSQL

- Built an **AutoML platform** using **AutoGluon** to automate financial model development, eliminating manual feature engineering and model tuning with 50+ technical indicators and ensemble methods, reducing development time from weeks to hours.
- Developed a **backtesting engine** for strategy validation with walk-forward analysis, real-time predictions via **FastAPI** and **WebSocket**, and an interactive **Streamlit** dashboard for stock direction, volatility, and portfolio optimization.
