WORK EXPERIENCE

Data Analyst— Phoenix, AZ, USA

Jun 2025 – Present

ASU Enterprise Technology - AZ-1

- Developed automated reporting pipelines using **Azure Data Factory** and **SQL**, refreshing statewide broadband datasets daily, optimizing data refresh schedules, and reducing manual processing workloads by 45% while improving data availability for leadership.
- Built **Power BI dashboards** using **star-schema modeling**, optimized **DAX measures**, and performance-tuned visuals with drill-through filters and dynamic slicers, helping teams evaluate broadband coverage gaps and service metrics with sub-second response times.
- Implemented **AI-powered anomaly detection** using **Python** and **Azure ML**, identifying data quality issues, schema violations, and outliers across 10M+ broadband records, improving data accuracy by 35% and strengthening trust in statewide datasets.
- Developed an **AI chatbot** using **Azure OpenAI** and **LangChain** for natural-language querying of broadband metrics, enabling self-service analytics for non-technical stakeholders and reducing analyst workload by 60% through automated report generation.

Data Analyst – Phoenix, AZ, USA

July 2024 – May 2025

Center for the Future of Arizona

- Analyzed large financial, health, and program datasets in **AWS** using **Python**, **SQL**, and **Alteryx**, surfacing KPI trends and generating insights that supported statewide policy and funding decisions with **evidence-driven analytics**.
- Built automated Domo **dashboards and dataset pipelines** using **Workbench**, **Magic ETL**, and **Beast Modes**, centralizing cross-department metrics and **reducing manual reporting workloads by nearly 50%** across stakeholder teams.
- Developed **predictive models** using **scikit-learn** and **regression analysis** to forecast program outcomes, funding needs, and resource allocation, improving planning accuracy by 30% and enabling data-driven recommendations for policy leaders.

Data Analyst - Phoenix, AZ, USA

May 2023 – Jun 2024

Arizona State University (America Reads)

- Built **SQL-based ETL pipelines** in **Python** and integrated student, performance, and operational datasets into **Snowflake**, implementing data quality checks, improving data governance, and accelerating reporting cycles by 60% for program leadership.
- Automated near-real-time ingestion using **Snowpipe** and **Snowflake Tasks**, reducing manual refresh operations, implementing **change data capture (CDC)** patterns, and improving data accuracy for faculty, tutors, and program leadership.
- Developed **Tableau dashboards** and **Excel automation** (PivotTables, VBA, advanced formulas) with **predictive trend analysis**, uncovering performance patterns and optimizing budget allocation and staffing decisions across the tutoring program.

Risk Data Analyst - Remote, INDIA

Apr 2022 – May 2023

State Bank Of India

- Identified gaps in credit risk monitoring due to manual processes and built automated **ETL pipelines** using **SQL**, **Python (Pandas)**, and **SAS** to process 10M+ loan records, reducing data **errors by 35%** and improving risk report **delivery by 50%**.
- Developed credit risk dashboards using **Power BI and SQL** to track key risk indicators, including NPA ratios, default rates, and portfolio concentration, enabling **40% faster risk assessment** and supporting RBI regulatory compliance.
- Automated risk segmentation and early warning analysis by building reusable **SQL scripts using joins, CTEs, and window functions** with Python validation workflows, reducing turnaround **by 60%** and **improving detection of high-risk accounts by 25%**.

TECHNICAL SKILLS

Programming & Tools: Python, SQL, R, Excel, Git, Linux, REST APIs, VBA, SAS

AI & Analytics: scikit-learn, Regression, Classification, Predictive Modeling, Azure OpenAI, LangChain, NLP, ChatGPT, Copilot

Data & Cloud Platforms: AWS (Glue, S3, Athena, Redshift), Azure (Data Factory, Synapse, ML), GCP (BigQuery), Snowflake, MySQL

BI & Visualization: Power BI, Tableau, Domo, Alteryx, Looker, DAX, Star Schema, Dimensional Modeling

Data Analysis: Statistical Analysis, A/B Testing, Forecasting, KPI Tracking, Report Automation, ETL, Data Warehousing

EDUCATION

Bachelor of Science, Data Science (GPA: 3.7/4.0)

Jan 2023 – May 2025

Arizona State University

Tempe, Arizona

Associate of Science, Computer Science (GPA: 3.8/4.0)

Jan 2021 – Dec 2022

Ivy Tech Community College

Bloomington, Indiana

ACADEMIC PROJECTS

Python Auto Completer *Tech Stack:* Python, PyTorch, NLP

- Built an LSTM-based source code auto-completion model trained on cleaned TensorFlow repository data, achieving 30%+ keystroke savings during code input.
- Improved autocompletion efficiency by 50% through optimized tokenization, boundary detection, and reduced response latency.

FinanceForge (Finance AutoML Platform) *Tech Stack:* AutoGluon, FastAPI, MLflow, Docker, PostgreSQL

- Built an **AutoML platform** using **AutoGluon** to automate financial model development, eliminating manual feature engineering and model tuning with 50+ technical indicators and ensemble methods, reducing development time from weeks to hours.
- Developed a **backtesting engine** for strategy validation with walk-forward analysis, real-time predictions via **FastAPI** and **WebSocket**, and an interactive **Streamlit** dashboard for stock direction, volatility, and portfolio optimization.

CERTIFICATIONS

AWS Certified Data Analytics Specialty (DAS–C01)
